## Madani pearls for parents

1. Good training is of crucial importance in developing a child into a responsible individual of an Islamic society. Realising the responsibilities of ideal parents inculcate the devotion to Allah ﷻ and His Prophet ﷺ in children through recitation of the Holy Quran and Naat at home. Madani Channel is a useful source for this purpose.
2. Persuade your children to offer Salah since early age, with the intention of growing them habituated to it, and emphasise to offer Salah regularly as soon as they reach the age of seven.
3. Initiate delivering Dars from Faizan-e-Sunnat at home with the intention of learning and teaching the holy Sunnah of Beloved Prophet ﷺ.
4. To infuse the respect for parents, teachers and elders read them some accounts of pious predecessors from the publications of Maktaba-tul-Madinah.
5. To bring them up in accordance with Islamic teachings adopt good moral conduct, forbearance, gratitude, humility, and follow the teachings of Holy Quran and Sunnah, thus set a practical example for your children.
6. Instill into your children the avoidance of sins like lying, backbiting, slander, quarrel, swearing, unlawful use of eyes, etc.
7. Provide a balanced and healthy diet for the physical growth and health of your children. Feed them on a diet of milk, fruits, etc. with your Halal earnings.
8. Check homework diary of your child daily to become aware of his academic position. Attend parent-teacher / parent-management meetings regularly.
9. For the rectification of mistakes avoid beating your child, but rather make him understand with love and polite behaviour.
10. Always grant your child with prayers, e.g. blessings in knowledge and practice, long life, etc.

## Preface

Madani Mathematics is an integrated curriculum designed especially for pre-primary children in a way that they would actively learn the concepts and foundations of elementary mathematics. This book aims to develop the rational skills, conceptual clarity, confidence and ability to face the challenges.

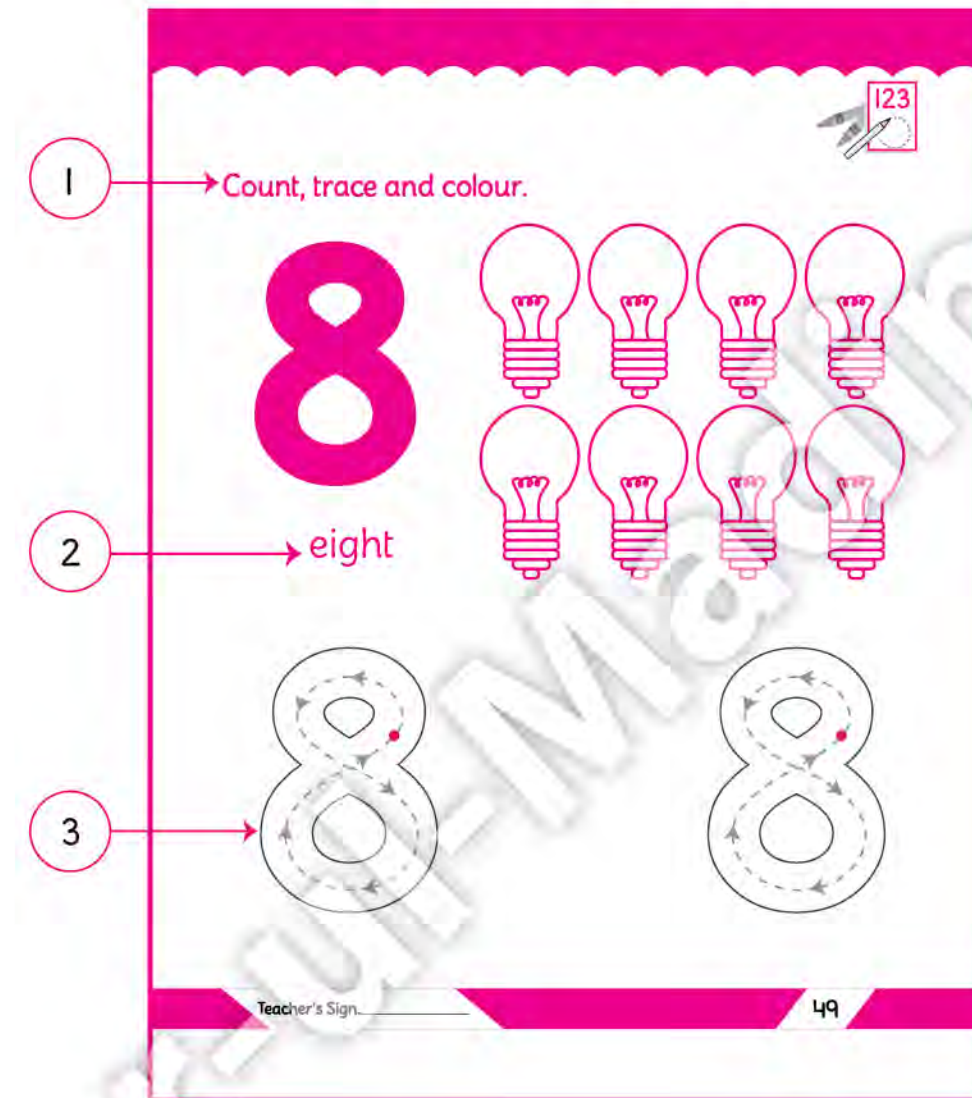

This workbook covers different areas like tracing numbers, colouring shapes, object identification, spatial concepts, colouring and a lot of reinforcement exercises. Textbook and workbook are not the same rather support each other to provide the concepts with clarity. The students may be assigned homework from this book and it will surely provide sufficient practice to make the concepts clear. This is also useful for the parents at home to coach their children with this valuable resource material.

This Mathematics package offers textbook and flashcards along with the book. Teachers are expected to manage the whole packaged stuff in a way that students could see the images and associate the words they are producing with the concepts or objects they study. It also really encourages them to learn new words. Mathematics flashcards offer knowledge about counting with their corresponding number of objects and some basic form of relevant information.

This humble effort has been accomplished by the grace of Almighty Allah ﷻ, the favour of His Noble Prophet Muhammad ﷺ and the spiritual support of our great Shaykh the founder of Dawat-e-Islami, 'Allamah Maulana Abu Bilal Muhammad Ilyas Attar Qadiri Razavi رَضِيَ اللهُ عَنْهُ الْعَالِيَهُ. It is presented to the students and teachers with the realisation of our weaknesses and limitations. We expect this book to be welcomed by the audience concerned. Any suggestions or recommendations to improve the substance will be gladly appreciated.
